

# Innovating Healthcare with Technology and Expertise

Conteir and Semantic-lab work together to transform healthcare through cutting-edge technology and specialized knowledge in healthcare standards.

- **Conteir** offers consulting services in e-health, AI, and healthcare terminology. We help healthcare organizations implement artificial intelligence, streamline SNOMED CT integration, and develop innovative decision support tools for healthcare professionals.
- **Semantic lab** creates intelligent solutions that simplify clinical workflows and improve patient care. Our flagship product, Semantic Pulse, provides real-time decision support, while Semantic AI enhances clinical accuracy using artificial intelligence.

Together, we aim to improve healthcare outcomes by empowering professionals and patients with advanced tools and technology.
